

Year 6 Learning Log – Autumn Term 2018

Subject: Science

Please choose a task per week which will be due in on the following Fridays: 23rd November, 30th November and the 7th December.

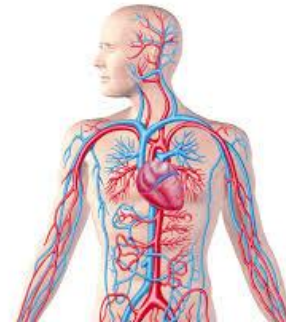

In class, we have started to learn about the circulatory system in the topic entitled “Humans and Other Animals”.

For your Learning Log tasks, we would like you to show us your understanding of how the circulatory system works.

We would like you to choose from the following:

- Make a labelled diagram or model of the human heart. How many chambers are there? What are their jobs?
- Make a labelled diagram or model of the circulatory system. How does the blood move around the body?
- Make a word-search or crossword with key vocabulary from this unit and their meanings.
- Or undertake any other creative task that will show us your understanding of all or part of the circulatory system.

To help you with these different tasks, we have also provided an information sheet with the key ideas and vocabulary.

We can't wait to see your Learning Logs!
