

TDS YEAR 6 BLOG

This is a Year 6 blog about our recent trip to the woods.

On Wednesday 21st November, we went to the dell in hunt of debris to build our mini shelters. After our visit, we went back to class with a bag full of sticks, leaves, mud, grass, moss and other resources from the woods.

Once we were back in the classroom, the task was to plan and construct a model of a mini survival shelter suitable for Robin Hood or one of the Outlaws. We had an hour to spend on the construction and we are hoping to finish them next week.

To build our shelter we used cardboard for our base and sticks or twigs for the starting point. We also used string and glue to secure our shelter together.

We used lots of different structures such as: The A – Frame and the Tent Shaped shelters. Some of the shelters have not gone as planned, but we have found a way to fix them. Our shelter is based on Robin Hood and his life. Upper Key Stage 2 has been working on Robin Hood for our Into the Woods project.

Next time we will share photos of our finished models in our next blog.

By Hannah, Charlotte, Finn and Ronnie from Year 6.
